Project Background

As our aim is to engage and develop youth in Indonesia while giving impact to specific issues around us. We give youth an understanding of SDGs and give them a chance to involve themselves in making a direct impact on it. We also develop the youth in many aspects such as leadership skills, soft skills and hard skills. To give impact on the educational issues on Kalimantan Barat, we create EduStanding as our program that giving insight about the issues and what can youth do to give impact on it by webinar and coaching session, then we give youth the chance to practice the skills they get on challenging experiences on school roadshow. In order to achieve this speaker's objective on this virtual talk are "How is the current educational environment in Kalimantan Barat", "How is the children's behavior in educational space in Indonesia", and "How we need to react to the children's behavior".

Project Description

Local Project is an initiative program which provides youth development in four weeks of virtual volunteering in a project which supports Sustainable Development Goals (SDGs). It provides youth the experience to create impact in society and introduce them to the concept of leadership development with us. EduStanding is a project that is aware that the poor school environment is a significant issue in West Kalimantan. This not only about the area hygiene but also other problems like bullying or students hatred toward their teacher. It goes beyond just poor hygiene to encompass issues such as bullying and student hostility towards teachers, besides the gap between teachers and students, there is also a gap between education for typical children and those with special needs, where the implementation of inclusive programs in West Kalimantan is still limited, and there is still a lack of societal awareness regarding the importance of at least understanding sign language. These problems often arise due to minor misunderstandings, educational disparities, and lack of modernization efforts. With many kids in Kalimantan Barat hooked on gadgets and a growing gap between students and teachers, there's a big problem with educational fairness when it comes to our national culture. Gadgets not only stop kids from understanding and valuing their heritage, but they also make it hard for teachers and students to connect. That's why it's really important to do something now to make education fairer and more culturally rich.

Project Objectives/Purpose

- Build and spreading awareness about current conditions in West Borneo, specifically about culture in education and children behaviors
- Exposure youth for SDGs 4 issues
- Encourage youth to have a better understanding of the schools conditions and teachers behavior
- Inclusive awareness towards deaf people by providing Youth with knowledge of
- Sign Language
- Have direct social impact on schools and children that are located in West Borneo
- Provide awareness and education to the public about the potential of Kampung Gambut's land
- Exposure to local culture by providing Youth practical experiences directly involved in the making of the local culture

Event Rundown

DAY 2						
Date : Monday, 15 July 2024
